SYNCMATE PRESS KIT

We would like to present you SyncMate, the ultimate sync app for Mac.

What can you sync?

SyncMate helps you to sync Contacts and Calendar entries, manage SMS and Call History, sync iTunes and iPhoto, folders, Safari bookmarks and reminders. Due to SyncMate you can run your sync sessions automatically in the background and even mount your devices or cloud storage as disks.

Friendly devices for SyncMate

SyncMate allows you to sync Mac with Android, iOS and other Mac, MTP or Mounted device, and also Google, Outlook, Dropbox and iCloud accounts. You can also connect Office 365 Home and Business and manage your OneDrive with SyncMate.

SyncMate Sync Service

SyncMate features own Sync Service which lets you sync locally avoiding any cloud mediums in OS X 10.8.5 and later. In this way the sync process is secure and safe, and you totally control your data.

And some more facts

We've designed intuitive interface for the better sync experience. Sync process is simple and clear, so users' data can be synced in a click. And also great news for Retina-display owners, SyncMate is completely Retina-ready.

System requirements

OS X 10.8.5 or later; Android 2.x - 5.x; iOS 5.x - 9.x
